

NAME: Jothika S

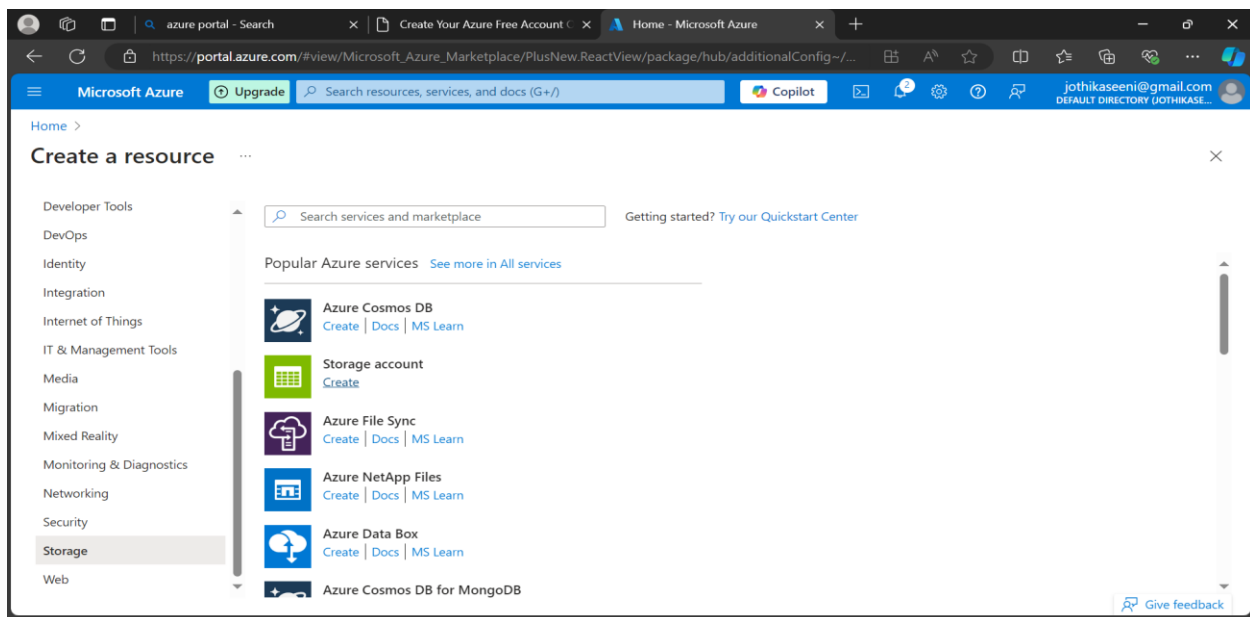

DOMAIN: Testing

Azure Account:

Azure Storage Account:

step 1: Click create in storage Account.

Step 2: Add Resource Group and Storage Account Name:

Home > Create a resource >

Create a storage account

Select the subscription in which to create the new storage account. Choose a new or existing resource group to organize and manage your storage account together with other resources.

Subscription *

Resource group *
[Create new](#)

Instance details

Storage account name *

Region *
[Deploy to an Azure Extended Zone](#)

Primary service

Performance * ☒ **Standard:** Recommended for general purpose file shares and cost sensitive applications, such as HDD file shares

[Previous](#) [Next](#) [Review + create](#)

[Give feedback](#)

Step 3: Advanced , networking, data protection as default and click next.

Home > Create a resource >

Create a storage account

Basics **Advanced** Networking Data protection Encryption Tags Review + create

Security

Configure security settings that impact your storage account.

Require secure transfer for REST API operations ☒

Allow enabling anonymous access on individual containers ☐

Enable storage account key access ☒

Default to Microsoft Entra authorization in the Azure portal ☐

Minimum TLS version

Permitted scope for copy operations (preview)

Network connectivity
You can connect to your storage account either publicly, via public IP addresses or service endpoints, or privately, using a private endpoint.

Network access *

- ☒ Enable public access from all networks
- ☐ Enable public access from selected virtual networks and IP addresses
- ☐ Disable public access and use private access

Private endpoint
Create a private endpoint to allow a private connection to this resource. Additional private endpoint connections can be

Recovery
Protect your data from accidental or erroneous deletion or modification.

☐ Enable point-in-time restore for containers
Use point-in-time restore to restore one or more containers to an earlier state. If point-in-time restore is enabled, then versioning, change feed, and blob soft delete must also be enabled. [Learn more](#)

☒ Enable soft delete for blobs
Soft delete enables you to recover blobs that were previously marked for deletion, including blobs that were overwritten. [Learn more](#)

Days to retain deleted blobs

☒ Enable soft delete for containers

Step 5: Make tags as default as it is.

The screenshot shows the 'Create a storage account' page in the Microsoft Azure portal. The 'Tags' tab is selected, showing a table with columns 'Name', 'Value', and 'Resource'. The table is currently empty. At the bottom, there are buttons for 'Previous', 'Next', and 'Review + create', along with a 'Give feedback' link.

Name	Value	Resource
------	-------	----------

Step 5: Review and create

The screenshot shows the 'Create a storage account' page in the Microsoft Azure portal, now on the 'Review + create' tab. It displays a summary of the configuration under 'Basics' and 'Advanced' sections. At the bottom, there are buttons for 'Previous', 'Next', and 'Create', along with a 'Give feedback' link.
